Oracle E-Business Suite
Oracle Cloud
Agentic AI Development

Sivanandam (Siva) Manickavasagam

Manager, Database & Infrastructure | Oracle EBS & Fusion Cloud ERP | OCI · AWS | Agentic AI
Greater Houston

Summary

I lead a team of 20 database and cloud engineers that keeps NOV's enterprise ERP ecosystem, used by 30,000 people worldwide, running at 99.999% availability. I'm now applying agentic AI (Claude Code, MCP) to automate routine operations work.Today my scope covers the infrastructure, middle tier, and databases behind three Oracle E-Business Suite environments, the Oracle Cloud Infrastructure (OCI) platform supporting our Oracle Fusion Cloud ERP program, and key on-premises applications including Primavera and Factory Scheduler. The team owns everything from architecture and capacity planning to patching, upgrades, disaster recovery, and day-to-day incident response.What I focus on:• Availability and resilience: high availability design, business continuity, and DR for systems the business can't run without• Hybrid cloud: running Oracle workloads on OCI and AWS alongside on-prem platforms, with infrastructure as code (Terraform, Ansible) and automation (Jenkins, Kubernetes, Docker)• Operational excellence: performance tuning, monitoring, patching and upgrade cycles, and a disciplined incident and change process• Agentic AI: building AI agents with Claude Code, MCP, and LLM frameworks, and exploring how they can take on routine operational work such as health checks, incident triage, and runbook execution• Leadership: building and developing a high-performing team, managing vendors and licensing, and keeping business stakeholders informedBefore NOV, I spent more than a decade in Oracle ERP consulting with IT Convergence, TAKE Solutions, and Tata Consultancy Services, delivering implementations, upgrades, and migrations for clients in the US and India. That consulting background still shapes how I work: start with the business outcome, then design the platform to support it.Now I’m combining that foundation with agentic AI, working toward infrastructure that doesn’t just stay up but increasingly helps run itself.

Experience

NOV

Manager, Database and Infrastructure Administration

May 2015 - Present (11 years 7 months)

Houston, Texas Area

• Lead a team of 20 database and cloud infrastructure specialists responsible for the availability, performance, and security of NOV's enterprise ERP landscape.

• Own infrastructure, middle tier, and databases for three Oracle E-Business Suite environments supporting global operations, with 30,000 users across 10 business units.

• Run the OCI cloud platform for the Oracle Fusion Cloud ERP program, covering architecture, environment provisioning, security, and integration with on-prem systems.

• Support on-prem business applications including Primavera and Factory Scheduler.

• Drive high availability, DR, and business continuity for business-critical systems, delivering 99.999% uptime with RPO/RTO measured in minutes.

• Automate infrastructure and operations with Terraform, Ansible, Jenkins, and Kubernetes.

• Build agentic AI workflows (Claude Code, MCP) integrated with Jira and our codebase to automate routine operational work such as health checks and incident triage.

• Manage software licensing, vendor relationships, and stakeholder communication.

Core Services

Senior Principal Consultant

October 2014 - April 2015 (7 months)

Greater Houston

• Led the database and Oracle EBS technical workstream for an Oracle ERP implementation delivered within 6 months.

• Designed and built Oracle EBS environments, including installation, configuration, and cloning for development, test, and production.

Tools: Oracle E-Business Suite 12.1, 12.2 · Oracle Database 11g, 12c · RAC · Data Guard · RMAN · PL/SQL

IT Convergence

Senior Principal Consultant
October 2012 - October 2014 (2 years 1 month)
Houston, Texas, United States

• Served as Oracle EBS and core DBA for multiple managed-services clients, handling upgrades, patching, cloning, and performance tuning.
• Helped a client reduce infrastructure and support costs during a challenging period for their business.
Tools: Oracle E-Business Suite 11i, 12.1, 12.2 · Oracle Database 10g, 11g, 12c · RAC · Data Guard · RMAN · PL/SQL

TAKE Solutions
Senior Programmer Analyst
February 2006 - October 2012 (6 years 9 months)
Houston, Texas, United States

• Hands-on Oracle core and EBS DBA for client environments, covering installation, upgrades, patching, and cloning.
• Implemented backup, recovery, and high availability solutions, and resolved production performance issues.
Tools: Oracle E-Business Suite 11i, 12.1 · Oracle Database 9i, 10g, 11g · RAC · Data Guard · RMAN · PL/SQL

Tata Consultancy Services
4 years 9 months

IT Analyst
October 2004 - February 2006 (1 year 5 months)
Rochester, New York Metropolitan Area

• Oracle EBS DBA on multiple ERP implementation and upgrade projects, working onsite with the client team.
Tools: Oracle E-Business Suite 11i · Oracle Database 8i, 9i, 10g · RAC · Data Guard · RMAN · PL/SQL

IT Analyst
August 2003 - October 2004 (1 year 3 months)
Greater Coimbatore Area

Systems Engineer
June 2003 - August 2003 (3 months)
Greater Coimbatore Area

Systems Engineer
June 2001 - June 2003 (2 years 1 month)
Mumbai Metropolitan Region

Education

Thiagarajar College of Engineering

Bachelor of Engineering, Mechanical Engineering · (1997 - 2001)
